<p>Para 11, page No.25 TENDER SAMPLE</p> <p>11.1 Requirement of Tender sample: Tender sample is required along with offer/bid. Tenderer are requested to deposit 01 No Personnel Diving Kit (Diving Suit, Breathing Apparatus, Weight Belt, Gloves, Dive Fins), 01 No. Spare Cylinder and 01 No. Knife as tender sample in sealed box with DIG (Prov.) HQ DG NDRF, Pt. Deendayal Antyodaya Bhawan, 9th Floor, CGO Complex, New Delhi on due date and time of opening of tender. In case, tenderer fails to deposit tender sample on due date and time, offer/bid of the firm will be rejected. Physical evaluation of tender sample will be carried out by a detailed committee in presence of representative of firm in respect of those firms who qualify in technical evaluation. No extension for submission of tender sample shall be granted in any circumstances due to emergent requirement of the stores. The Tender sample will be kept with DIG (Prov.) HQ DG NDRF till finalization of tender.</p> <p>11.2 Tenderer shall furnish test report certificate from Govt. Approved Lab/NABL/ILAC accredited lab or certifying agencies like BIS (i.e. ISI Mark)/ CE/EN/BIS conforming specifications procedure mentioned in this Corrigendum to tender enquiry for their offered model at the time submission of sample. In case firms submitting lab test report then, the lab test report should not be older than the date of issue of tender notice. In case, CE/EN/BIS certification is submitted, the validity of the certificate should be equal to the validity of tender at least. The offer received without lab test report/certificate as above will liable to be rejected.</p>														
<p>Para 11, page No.25 TENDER SAMPLE</p> <p>11.2 Tender sample is not required along with offer/bid at the time of opening of tender. The firms whosever found qualified in technical evaluation are required to submit 01 No Personnel Diving Kit (Diving Suit, Breathing Apparatus, Weight Belt, Gloves, Dive Fins). Maximum 15 days will be provided to the firms who qualified in technical evaluation for submission of tender sample for physical evaluation failing with their offers will be rejected. Physical Evaluation of the sample will be carried out by Board of Officer of NDRF along with technical representative of IRS in Delhi. No any extension for submission of tender sample will be granted in any circumstances due to emergent requirement of the stores.</p> <p>11.2 Tenderer shall furnish test report certificate from Govt. Approved Lab/NABL/ILAC accredited lab or certifying agencies like BIS (i.e. ISI Mark)/ CE/EN/BIS conforming specifications procedure mentioned in this Corrigendum to tender enquiry for their offered model at the time submission of sample. In case firms submitting lab test report then, the lab test report should not be older than the date of issue of tender notice. In case, CE/EN/BIS certification is submitted, the validity of the certificate should be equal to the validity of tender at least. The sample received without lab test report/certificate as above will liable to be rejected.</p>

 For and on behalf of the President of India

REVISED TECHNICAL SPECIFICATIONS OF PERSONAL DIVING KIT (DIVING SUIT, BREATHING APPARATUS, WEIGHT BELT, GLOVES, DIVE FINES)

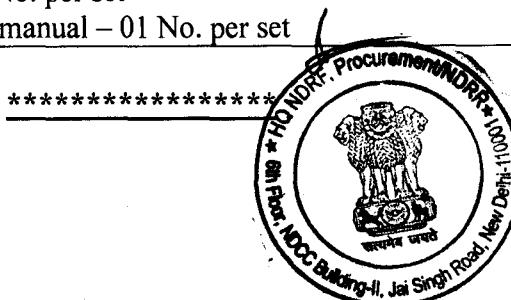

1.	SPECIFICATION OF BREATHING APPARATUS SET(DIVING KIT)	
1.	<p>ROLE: The self-contained underwater breathing apparatus (SCUBA) proposed is for carrying out under diving.</p> <p>GENERAL: The apparatus should be rugged, lightweight suitable for carrying by a signal person. The set should have its standard and optional equipment and should comprise of following:-</p> <ol style="list-style-type: none"> Compressed air cylinder pack Harness (Basic structure on which the cylinder are mounted and other accessories for donning the set are fitted) Face mask with breathing/demand valve A regulator unit Air supply system Pressure indicating gauge Buoyancy compensating device Test Kits Tools Kits 	
2.	SPECIFICATIONS OF CYLINDER:-	
01	Nominal capacity of Cylinder	8-12 liters
02	Charging pressure	200-300 bars
03	Capacity of Cylinder after charging	Not less than 2400 liters
04	Weight of Cylinder	Not more than 20 kg.
05	Weight of water	Not more than 03 Kg.
06	Cylinder makes	Alloy steel with unlimited life.
a)	<p>The set to have a wide vision, full-face mask with 3-6 straps, which will not allow water to enter inside. The straps provided should form an effective seal on to the face.</p> <p>Re-breathing of carbon dioxide enriched exhaled air must be eliminated and the breathing resistance must be as low as possible whilst the equipment must have sufficient capacity to cater for even an extremely hard work rate.</p> <p>In case the diver does not want to use the full-face mask then the breathing valve with mouthpiece should suffice for the use underwater.</p> <p>Mouth piece to have separate inhale and exhale channels so that the moisture from the diver cannot get deposited in the inlet section of the breathing valve. This avoids risk of valve freezing in open positions.</p> <p>There should be a mechanism to have a reserve air in the set and indication to that effect available.</p> <p>The set should be designed for use in temperatures range of minus 10 degree Celsius to 50 degree Celsius.</p> <p>The set should withstand sea state up to 5h/ conforming to EN250/EN1809 as applicable to be provided.</p> <p>Complete set should be provided by one OEM only.</p>	
3.	DOCUMENTATIONS: The following documents are to be provided:-	
a)	General Arrangement drawing giving overall and all-important dimension and with sufficient details so that all standard equipment can be identified.	

	<ul style="list-style-type: none"> b) Operational Manual giving details of maintenance and repair instructions. c) Test and trail report, if any along with inspection certificate. d) Complete list of one year on Board Spares to be provided. e) Complete list of five year spares to be provided. f) Documentation of full range of spare along with paper particulars. g) Undertaking of OEMs as well as bidders to supply the spares for minimum period of 5 years.
4.	PRESERVATIONS:- Firm is to furnish preservation procedure of the diving set of any.
5.	<p>SPECIFICATIONS OF DIVING SUIT</p> <ul style="list-style-type: none"> 1. The diver wet suit proposed is for use by the divers operating underwater, which can be easily seen whilst on the surface of water. 2. The basic design should be of one piece with sleeves up to the length of arm and the portion below torso up to ankle level 3. The wet suit provided should be without hood. The suit to have a cut designed to avoid under arm-seams. 4. The lower part of the suit is fully covering the legs stopping just above feet /ankle. 5. The diver should be able to don the suit very easily and feel comfortable 6. The above wet suit should be made from macro cellular neoprene with thickness of 3 mm. 7. Size of suit. <ul style="list-style-type: none"> a) Small b) Medium c) Large
6.	<p>SPECIFICATIONS OF BOOT DIVER</p> <p>The boot used in conjunction with above - mentioned wet suit should be made from double lined neoprene with non-slip sole, which reduces, wear and prevents sliding on wet or slippery surfaces. Thickness of the socks should be 5 mm.</p> <p>Size of boot diver</p> <ul style="list-style-type: none"> a) Small b) Medium c) Large
7.	<p>SPECIFICATION OF WEIGHT BELT, DIVE FINS, GLOVES</p> <p>1. WEIGHT BELT</p> <p>ROLE</p> <p>To attach lead weights of 1 kg (4 pieces) to a diver to adjust buoyancy during a diving operation.</p> <p>2. MAIN FEATURE</p> <ul style="list-style-type: none"> i) Waist belt made of polypropylene/ nylon fabric should have a quick release non-breakable buckle of plastic / fiber / non-corrosive soft metal of adjustable size of tightening. ii) Four polypropylene fabric pouches stitched/attached to the weight belt to put weights of 1 Kg (04 pieces) inside. The pouch opening independently on top to have button mechanism/Velcro. iii) The belt should be of adjustable 30" - 45" range in length, 3 mm thick and 2" broad (approx.). iv) Colour: Black v) Weight – 1 kg lead each (4 pieces) per set.
8.	<p>SPECIFICATION OF FINS SWIM (DIVE FINS)</p> <p>ROLE:-Assist Diver in hands free swimming on surface and underwater. These fins are for use during long distance/ against current.</p> <p>2. MAIN FEATURES</p> <ul style="list-style-type: none"> i) Description - Colour black. Length not less than 17", Width not less than 4" (top) and 8.8"

	<p>(Bottom). Dimension tolerance \pm</p> <p>ii) Material - Thermoplastic rubber/ Natural rubber. Should not skid even on a wet metal deck.</p> <p>iii) Hydrodynamic shape - The shape of the fin to facilitate:-</p> <ol style="list-style-type: none"> Max propulsion whilst swimming in water using flutter and frog kick. Suitable for swimming for long duration without causing undue fatigue. <p>iv) Shoe Pocket - Pocket should be 7" - 8" deep with an adjustable back strap (not less than 1.5 inch in width). Inner part should be made of soft rubber for use with bare feet. One additional back strap should be supplied with the fins.</p> <p>v) Buoyancy - Approximately 10% negatively buoyant</p>
9.	<p>SPECIFICATION OF GLOVES (DIVING KIT)</p> <p>GLOVES</p> <ol style="list-style-type: none"> Gloves should be made of neoprene The Palm of the Gloves should be made of anti-slippery polyurethane. The thickness should be not less than 3 mm Gloves should be suitable at a depth of not less than 50Mtrs
10.	<p>SPECIFICATION OF UNDER WATER COMM SET (WITH WIRED)</p> <p>i) ROLE: The equipment should establish and maintain voice communication between the Divers under water and the Attendant/ Supervisor of the surface during a diving operation to a depth of 50 meters.</p> <p>ii) ESSENTIAL PARAMETERS:</p> <ol style="list-style-type: none"> Should be able to maintain continuous voice communication between surface team and the divers under water to a depth of 50 mtrs with 02 channels. Should be rugged. Have mechanism to prevent water from entering the system The supervisor set should permit hands free use on the diving site. Length of the umbilical provided should be 50 meters with strength min 1500 N <p>iii) GENERAL PARAMETERS:</p> <ol style="list-style-type: none"> The battery life should be minimum 8 hour. Type of components/ connectors used should not be of fragile material and compatible with each other with quick removal system. Communication set should operate minus 10 to 50 degree centigrade. <p>iv) WATER RESISTANCE MATERIAL: The panel and other exposed parts should be of water resistant material and incorporate water proof switches that avoid the ingress of water.</p> <p>v) CLARITY OF SPEECH: High fidelity of the speech should be there in between surface attendant and under water diver.</p> <p>vi) PRINCIPAL COMPONENTS OF EQUIPMENT: The Diver Under water communication system (DUCS) should consist of under mentioned components:-</p> <ol style="list-style-type: none"> Diver unit with bone conductor and speaker with attachment to the diving set mask – 02 Nos. per set Communication cable of 50 mtrs length with connectors – 02 Nos per set. Surface unit with speaker, amplifiers and headphone – 01 No. per set Rechargeable cells/batteries for divers unit and surface units – 01 No. per set Charger for the batteries – 01 No. per set Carrying case – 01 No. per set Repair kit/Tools Kit – 01 No. per set Operational and technical manual – 01 No. per set
